Permit Support Services Rep:

Project Description: WA6413 AT&T Upgrades

I am submitting an application for personal wireless service facility for Eligible Facility modification. The modifications will be taking place on an existing stealth monopole mounted cell facility located at: 3500 S Meridian Ave. NW, Puyallup, WA 98373. Lease space will not be affected by this scope of work. The scope of work qualifies as an Eligible Facilities Request for a minor modification under Section 6409a. (Please note: all work will be performed wholly within the existing premises and utility easements; this site incorporates concealment features; and the project otherwise complies with the site's original conditions of approval.)

<u>Component</u>	<u>Federal Section 6409 Limits</u>	<u>AT&T's Proposed Modification</u>
Increase height of original structure	10% not to exceed 20 feet	No increase in height.
Antennas extending horizontally from edge of structure	6 feet or less	Antennas extend less than 6 feet horizontally from edge of structure
Additional equipment cabinets	4 or fewer, with no cabinets larger than the existing cabinets	No additional equipment cabinets will be installed.

Below is a detailed project description for your review:

AT&T PROPOSES TO MODIFY AN EXISTING UNMANNED TELECOMMUNICATIONS FACILITY BY: adding 6 antennas, adding 44"x10' tower extension, replacing existing plant plant, and ancillary equipment on existing facility.

Sincerely,

Bernard Dumyahn

10 ft height increase is proposed, this does not exceed the 20 ft height limit for exemption
