Project: Pierce College Puyallup Parking Improvements, AHBL No. 2200718.12
Subject: Final Storm Drainage Report, Permit Application No. PRCCP20220189

Dear Mr. Hulse:

During the construction of the Pierce College Puyallup Parking Improvements, AHBL conducted site visits at intervals appropriate to the various stages of construction. These site visits were conducted to become generally familiar with the quality and progress of the construction work related to stormwater management.

From these observations, it appears that work was completed in substantial conformance with the approved engineering design for stormwater management. Because of unanticipated circumstances during construction, there were some minor deviations from the approved engineering design for stormwater conveyance. All changes, such as revised invert elevations, catch basin rim elevations, and catch basin locations, are reflected in the Record Drawings.

If you have any questions, please call me at (253) 383-2422.

Sincerely,

William J. Fierst, PE
Principal
