

EHD FASTENERS AND RHINO BOND® PLATE

PRODUCT DESCRIPTION

Mule-Hide EHD Fasteners are used with Carlisle TPO or PVC RhinoBond Induction Welding Plates to secure Mule-Hide TPO and PVC roofing membranes. EHD Fasteners may be used on 22-gauge (0.76 mm) to 18-gauge (0.81 mm) steel or wood decks (minimum 15/32" [12 mm] CDX plywood). The fastener is designed to offer optimum driving performance, back-out and corrosion resistance with excellent pullout values. The Carlisle RhinoBond TPO or PVC Induction Welding Plates are designed to attach the roofing membrane from the underside using the RhinoBond induction-welding tool.

Mule-Hide EHD Fasteners

Typical Properties and Characteristics			
Screw Length*	Weight /Box	Thread Length	Packaging Fasteners/Box.
1-1/4"	12.6 lbs.	1-1/4"	1,000

BENEFITS & SUPPLEMENTAL STATEMENTS

- Reduces the number of fasteners and plates compared to conventional mechanically attached applications
- No perimeter sheets required
- Faster dry-in time
- Non-penetrating system
- Even load-distribution across membrane

Product Data Sheet

EHD FASTENERS AND RHINOBOND PLATES

INSTALLATION INSTRUCTIONS

No pre-drilling is necessary for wood and steel decks. Simply insert the EHD fastener through the RhinoBond plate and install with a standard clutch drive electric screw gun (0-2500 rpm). Optimum fastener performance is achieved when the fastener is installed perpendicular to the deck and into the top flutes of a steel deck. Follow the Mule-Hide RhinoBond System installation instructions to attach the membrane to the installed plate using the RhinoBond portable induction tool.

Keep insulation substrate and membrane clean. Any debris on the top of the insulation substrate and/or the membrane should be removed prior to initiating the induction welding process. Use a leaf blower or broom to eliminate any debris from the membrane surface.

Review Mule-Hide specifications and details for complete installation information.

PRECAUTIONS

- Eye protection is recommended during installation
- Use care to avoid over-torquing the fastener
- Do not expose plates to UV for extended periods

PROTECTION & SAFETY

Mule-Hide maintains Safety Data Sheets on all of its non-exempt products. Safety Data Sheets contain health and safety information for your development of appropriate product handling procedures to protect your employees and customers. Mule-Hide Safety Data Sheets should be read and understood by all of your supervisory personnel and employees before using Mule-Hide products in your facilities.
