On this day we have inspected your construction for **Engineering Daily Inspection** and we find the following result of the inspection. If there are any questions, please contact the inspector below.

Comments: Archer installed the 1-1/2" water service out of the RPBA stopping before entering the building.

The water service street patch was not tee cut, no tack, no collar around the valve box and done in 4" plus lifts. This makes it a temp patch and all of the asphalt will need to be removed and replaced before the grind and overlay top 2" is paved.

Corrections:

- 1 When blocking the sidewalk the contractor must have sidewalk closed ahead, sidewalk closed , and a pedestrian detour set up.
- 2 install catch basin socks along the frontage.

Sincerely,

Jeff Hill
