Subject: Fire Sprinkler Permit

To Whom It May Concern,

Fire Systems West will be adding and relocating sprinklers for the new space layout located in an existing warehouse. FSW will also be changing existing upright sprinkler located in a concealed combustibile space to new pendent style sprinklers to allow for new 12" of insulation to be installed at the deck. This project is a tenant improvement that does not involve a change in occupancy hazard and will not affect existing hydraulics.

Sincerely,

Kevin Rider
