INSPECTION REPORT

Date of Inspection: Jul 01, 2024

Inspection Result: **PARTIAL PASS**

Permit Number: PRFUP20231536

Property Address: 1006 39TH AVE SE, PUYALLUP, WA 98374;

Contractor: PSE - INFRASOURCE 3130 S 38TH ST TACOMA, WA 98409

To construct: 109145875 - Gas Main remediation - Install 1598' of 2" gas main, we will replace 8 services and install 7 test sites (T&T). Sidewalk was considered but not enough room for our gas utilities to be safely installed requesting hard surface cuts - detailed in restoration plan. Work is primarily on 10th St SE.

On this day we have inspected your construction for **Engineering Daily Inspection** and we find the following result of the inspection. If there are any questions, please contact the inspector below.

Comments: Met AA Asphalt on site for a restoration walk.

- I changed a couple of patches due to the close proximity, leaving a few feet in between patches and the cracked/recessed existing would pose a rough tie in condition.
- The intersection at 39th. The city will provide a new MH frame and cover, AA Asphalt will need to replace it when performing the patch.

Corrections:

- 1 - Where gas services went under curb and gutter a hoe pack or jumpin jack (not plate compactor) will need to be used on both sides prior to pave and concrete.
 - Intersection of 10th and 39th. Patches will need to be placed a day before grind and overlay. No patching and grind and overlay in the same night. Patches need to be fully cooled prior to grind and overlay.
 - Please schedule restoration inspection for the day of saw cutting. Saw cutter will be sent away if this is not done.
 - On the thin asphalt areas, NO overcut.
 - Landscape will be inspected towards end of asphalt and concrete restoration.
 - Entire street (10th) will need to be swept gutter to gutter.
