Street Tree Removal/ Replanting/ Planting Design and Submittal Requirements

- If you are applying for a right-of-way permit to remove/replant a street tree, then these additional items are required (disregard if you are applying for a right-of-way permit for another purpose other than street tree removal/replanting):

Street Tree Removal Requirements

- 1. An overhead site plan drawing, sketch or photo (such as Google earth or other online service) showing location of existing street tree(s) and proposed street trees (if required to replant).
- 2. Arborist report for unhealthy, hazardous trees, or evidence (photos) that the trees to be removed are dead. Dead trees do not require an arborist to assess them for application to remove. Street trees may also be removed if damaging utilities or infrastructure.
- 3. Plan for staging and use of the right of way to conduct removal by contractor. Traffic and/or pedestrian control plan may be required.
- 4. Plan for stump grinding and clean-up of right of way after tree removal is finished.
- 5. Plan to replant street trees. All street trees which are removed from planter strips which are wider than 4' may be required to be replanted. The plan to replant required street trees must include the following:
 - 6. Site plan showing location of proposed replanted street trees and location of utilities (both underground and overhead; call 811 for utility locate). All street trees must be located 10' from water and sewer lines. Replaced street trees must have root barriers installed in accordance with the Vegetation Management Standards (VMS) Manual to protect sidewalks. Requirements for root barriers can be found on Pg. 12 of VMS. Show location of root barriers on site plan. City standard detail for root barriers (detail #01.02.03) can be accessed online [here](#)
 - 7. If the planter strip area (between curb and sidewalk) is less than 4' wide, street trees are not permitted to be replanted. Provide the Width of Planter Strip _____.
 - 8. List all tree species to be planted, refer to Puyallup Vegetation Management Standards manual Pg. 27-35 for approved species list for street trees. Manual can be access online [here](#). Proposed Street Tree species to be planted: _____

Street Tree Planting Requirements

- If your application is to plant new street trees, provide a design and submittal items meeting steps 6-8 above under the Street Tree Removal Requirements list. Note: City may adjust the location of your proposed street tree plantings to avoid conflicts with traffic sight distance and other standards.

Certification

I certify that I have read this application and declare under penalty of perjury that the information contained herein is correct and complete.
