

The two water taps will be on our water main on the east and west side entrance to 409 and 433 43rd Ave SW . The water services will be at the back of the easement north of 116<sup>th</sup> st. The existing hydrant will be replaced with a new one on the west side of 409 43rds property. Everything is being done as per the owners design already approved by the city.

Thanks Ed
