

To Whom It May Concern,

March 19, 2025

East Town Crossing, Puyallup, WA

BPU E 824

This document is to certify that based on what is visible, the BioPod has been installed correctly and will function as intended. Oldcastle was present during installation.

Oldcastle recommends that the site be paved prior to water quality treatment device being put online; in order to avoid treating construction runoff.

Oldcastle recommends a standard maintenance interval of 6 months to 1 year for the 2" mulch layer.

Oldcastle recommends visual inspection of media layer (life cycle estimated at 10-15 years) at time of mulch replacement.

Please contact me if you have questions.

Kind Regards,

Casey Krapfl
