ISSUED PERMIT

Building	Planning
Engineering	Public Works
Fire	Traffic

The approved construction plans, documents, and all engineering must be posted on the job at all inspections in a visible and readily accessible location.

Full sized legible color plans are required to be provided by the permittee on site for inspection.

Approval of submitted plans is not an approval of omissions or oversights by this office or non compliance with any applicable regulations of local government. The contractor is responsible for making sure that the building complies with all applicable codes and regulations of the local government.

Install anchors per sign manufacturer's instructions. Fasteners must be anchored to existing structural framing members.

The fasteners must be installed in accordance with the product's ICC-ES Evaluation Report (ESR) and the manufacturer's installation instructions. A copy of the instructions must be available on-site during installation and during inspections.

Sign must be approved by the National Electrical Code, Underwriters Laboratory, and all applicable local codes. Installation Note: For installation, tenant is responsible to provide the 120 volt that run from the main power panel to behind where the sign will be install. This need to be complete prior the date the sign will be install.
