RE: Life Science Logistics TI — Mechanical permit comments

The following revisions have been made to the mechanical plan to address the permit comments dated April 30, 2025:

- An overall building plan has been provided to indicate the area of work
- A grille tag has been added to clarify that the transfer grilles are lay-in type
- The grille schedule has been consolidated to only include the two types of grilles that are used

Thank you,
Zachary Dickson
