

Permit with L&I and install all necessary exit path illumination and exit signs for the revised and updated floor plans. Testing of the system will be required prior to use of the rack storage. See IBC chapter 10 for lighting requirements.

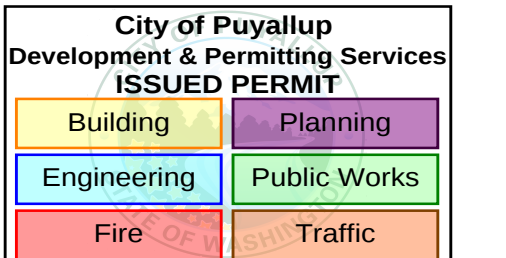

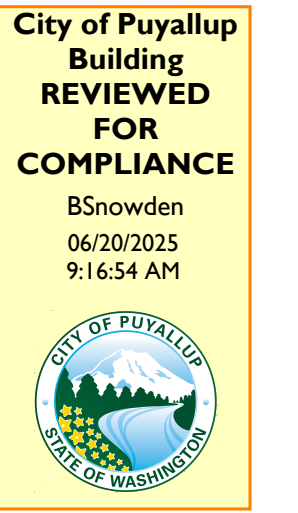

Provide load limit placards in each rack area, type, and/or shelf with variation in load limits per engineers design. Packards to be durably constructed and posted for inspection. See RMI standards for details.

Do not use or load racks until after Final Inspection Approval.

FLOOR PLAN
RP-1

The approved construction plans, documents, and all engineering must be posted on the job at all inspections in a visible and readily accessible location.

Full sized legible color plans are required to be provided by the permittee on site for inspection.

Approval of submitted plans is not an approval of omissions or oversights by this office or non-compliance with any applicable regulations of local government. The contractor is responsible for making sure that the building complies with all applicable codes and regulations of the local government.
