

Playground Equipment.com

PRDK20251632

To Whom It May Concern:

Please let this letter serve as notice that all products manufactured by Qitele Playground Equipment and marketed as "PlaygroundEquipment.com" Brand meets the CPSC guidelines as directed by the "Handbook for Public Playground Safety" and the Standard Consumer Safety Performance Specifications for Playground Equipment for Public Use as dictated by ASTM F 1487-21.

If we can be of any further assistance regarding verification of our products, please do not hesitate to contact PlaygroundEquipment.com at 800-667-0097 or support@playgroundequipment.com.

Sincerely,

Kevin Van Wye

General Installation Introduction

This document is provided as a general guide to playground installation. Each structure will include an install sheet specifically made for that particular structure.

PLEASE NOTE THE FOLLOWING:

STORAGE:

When play equipment is received at a job site it should be installed as soon as possible (within a few days from receipt). The equipment is packaged to keep it safe and damage-free during shipment. However, the packaging material is not suited for periods of extended storage in an uncontrolled environment. The combination of moisture from the environment mixed with the heat generated inside the plastic wrapping may cause damage to the finish of the powder-coated items.

If an immediate installation is not possible, certain steps should be taken to minimize the risk of damage to the equipment. If play equipment must be stored, ideally it should be kept in a controlled environment (storage container, inside building, etc...) away from heat and moisture. If this is not possible, the packaging material should be removed from the equipment, using caution so as not to damage the finish with special regard given to powder coated items. Any large sheets of poly (panels, arch bridge panels, slide hoods, etc.) need to be stored flat or well supported to prevent warping.

INVENTORY:

Please note that inventory should only be taken with the Packing List that ships with each job.

FOOTING INFORMATION:

The following footing guidelines are general and do not supersede any specific information given in any individual set of drawings or instructions. Footing detail drawings are given at the end of this document. Recommended concrete minimum: 2500 PSI.

18" Wide x 18" Deep Footing (does not include safety surfacing depth)

Vertical posts in structure (3.5" and 5")

Most Swings (excluding 5" Single Post)

12" Wide x 18" Deep Footing (does not include safety surfacing depth)

Slide Feet / Slide Supports

Transfer Stations

Lily Pads

Ground to Deck Stair Handrails

Single Steps

Climbers attached to Structure

18" Wide x 36" Deep Footing (does not include safety surfacing depth)

Single Post Swing (5")

We recommend that you build your modular structure in a radiating fashion. This means that you will start with a single post or deck assembly located at the core of the structure creating a central backbone to build outward from. Erect this post or deck assembly with the posts in the footings but not concreted into place. After completing this task you will be able to radiate outward in all directions with the remaining decks, bridges, crawl tunnels, overhead events and modular components. **We recommend you use the ACTUAL PARTS to locate the vertical post locations ALONG with the FOOTING LAYOUT drawing provided.**

There may be situations or special circumstances that will require you to use your own judgment. If you have any questions or are unsure about a situation, please contact your local Sales Representative.

Taking the time to read these instructions in their entirety will help ensure that your equipment is assembled correctly, maintained properly and enjoyed with proper adult supervision so that children can enjoy it for years to come.

PLAYGROUND SITE PREPARATION:

Using the provided plan view drawing of your playground, locate all structures within your site making sure that the placement of the structures meets all required clearances.

All asphalt, concrete and other such hard debris must be removed from the entire site prior to installation.

Site must be graded as close to level as possible to create the safest possible environment for the playground. Special installation considerations must be implemented for sites that are not level.

Check local soil and drainage conditions within the site area. Proper drainage around the structures and their supports is important. Inquire with local contractors in your area for the proper recommendations.

Check with local authorities regarding building codes, permit needs, requirements, etc. before beginning installation.

Site must be isolated from hazards such as swimming pools, ponds, lakes, other bodies of water, highways, roads, drop-offs, cliffs, etc. A method to contain children must be provided that still allows for observation by supervisors. If fences are used, they should conform to local building codes and/or ASTM F-2049.

Site should be surveyed and marked for underground utilities prior to excavation.

Never leave the job site unattended without making sure that all open holes are covered with a material such as plywood. Rope off all unfinished equipment to keep the children away until the build is complete.

PRE-INSTALLATION CHECK:

Compare all items received to the main packing list. Notify your sales representative immediately if any parts are missing or damaged. We are not responsible for items discovered missing after 72 hours from time of delivery!

COMMON INSTALLATION TOOLS

- A) 9/16" Wrench
- B) Wheelbarrow (to mix concrete)
- C) High Speed 3/8" Electric Drill w/clutch with 1/4" and 1/2" Bits
- D) String Level, Magnetic Level, 4' Level
- E) Large Flat Head Screwdriver
- F) Mallet
- G) Hack Saw
- H) Impact Gun
- I) Shovel / Post Hole Digger / Auger
- J) Pry Bar
- K) Tape Measure
- L) 3/16" and 1/4" Allen Head Wrench
- M) T-45 TORX Tool (supplied by the manufacturer)
- N) T-30 TORX Tool (supplied by the manufacturer)
- O) Straps and boards to help hold structure in a level position before and while concrete sets.

SAFETY AND CLEARANCE STANDARDS AND GUIDELINES:

Our play equipment is engineered and designed based on the most current ASTM F1487 standard.

For information regarding public playground safety and your responsibilities as the purchaser, manager or installer of this equipment, we recommend you contact the U.S. Consumer Product Safety Commission (CPSC) for the latest copy of the Public Playground Safety Handbook. You may obtain a copy of this guidebook by contacting the CPSC at 800-638-2772, or by visiting their website at www.cpsc.gov.

The playground area, both around and underneath the structure, must be covered with impact attenuating surfacing material. The surfacing material used should have a Critical Height Value of at least the height of the highest designated play surface on the equipment. The critical height for surfacing is to be rated in accordance with the most current version of ASTM F1292. To purchase a copy of ASTM F1292, Standard specification for impact attenuation of surface systems under and around playground equipment, contact American Society for Testing and Materials (ASTM) by calling 610-832-9585, or by visiting their website at www.astm.org. This information is also given in the Public Playground Safety Handbook. Additional considerations for protective surfacing materials are given as well.

Acceptable playground surfacing materials are available in two basic types: unitary or loose-fill. Contact the manufacturer of unitary surfacing materials (rubber matting) for the critical height rating for their products. If loose-fill surfacing materials are used, please refer to the Public Playground Safety Handbook published by the CPSC for critical height values for tested materials. We recommend a minimum depth of 12" for our play equipment.

Never add components that are not approved by the manufacturer.

If relocation of any equipment is desired that differs from the drawings and/or site plan that was provided, prior written approval from the manufacturer must be obtained. Failure to do so may create a dangerous play environment for children.

If individual pieces of equipment are ordered as parts only (without being placed in a site plan drawing), it is the responsibility of the customer/installer to determine the appropriate use zone needed for that equipment. Contact your local sales representative to get this information.

If you have any doubt about the correct placement of any piece of equipment, please contact your sales representative to get clarification.

Unless specified otherwise, the fall height of a piece of equipment is the distance between the highest designated playing surface and the protective surfacing beneath it.

The use zone for equipment should extend a minimum of 6' in all directions from the perimeter of the equipment.

The use zones of two stationary pieces of playground equipment that are positioned adjacent to each other may overlap of the adjacent designated play surfaces of each structure are no more than 30" above the protective surface and the equipment is at least 6' apart.

If adjacent designated play surfaces on either structure exceed a height of 30", the minimum distance between the structures should be 9'.

Use zones of the play equipment will be shown in the plan view drawing and must be adhered to. The fall height of the equipment will also be given in the drawing.

INSTALLATION GUIDELINES

Excavate holes in accordance with footing drawing. If the site cannot be graded level, adjust the depth of footings to maintain a level footing base. If soil conditions are loose or unstable, a larger diameter footing may be required.

As mentioned earlier, we recommend that the equipment be built in a radiating fashion from a central post. After verifying equipment will fit in area as shown on drawings, locate and set central post in footing hole.

Assemble the entire structure before pouring the concrete, using the equipment to place vertical posts (verify using footing drawing). This will be the procedure unless otherwise instructed per the individual instruction. After completing assembly, make sure structure is level and plumb across the board before pouring concrete. Concrete with a minimum PSI of 2,500 must be used, and should be mixed in accordance with manufacturer's specifications.

Never leave the installation site unattended without making sure that all fastening hardware on all equipment is tight. Failure to do so may result in injury or component damage.

All installation areas should be roped off with clearly marked warning signs posted. Even during installation, it has been found that children will use unattended equipment - thereby risking accidents. Do not attach swing chains, exercise rings, or similar moving components until entire construction is complete and safety surfacing is in place. Remember that any equipment that appears to be complete will invite unauthorized usage regardless of its actual state of readiness.

Keep installation site roped off for at least 48 hours before equipment usage to allow concrete to harden.

We recommend you have a Certified Playground Safety Inspector (CPSI) on site during installation. At a minimum, a CPSI should inspect your structure after installation and safety surface is in place and prior to children playing on the playground.

Typical Overhead Layout View

Typical Footer & Post Layout Diagram

Example of Footer

Inground Post/Mount Installation

STEP: 1

DO NOT CEMENT POSTS/MOUNTS INTO PLACE UNTIL THE ENTIRE STRUCTURE IS ASSEMBLED.

Refer to the General Installation guide footing size information and digging proper holes for the support posts/mounts.

3.5-inch Clamp Installation Examples

The following three pages will include examples of how to install some of the most common types of Clamps that are present on our structures that use 3.5-inch outside diameter posts. The structure that you are assembling might not require all the types of clamps listed in these examples.

The Install Guides for specific components that come later in this document might call for a specific type of clamp (a tube clamp for example), those sections will not include detailed instructions for the clamps and should direct you back to this section for more detailed information.

3.5-inch Flat Clamp Install Example

Connect half of the flat clamp to the component using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the backside of the flat clamp around the post.

3.5-inch Clamp Installation Examples

3.5-inch Tube Clamp Install Example

Connect half of the clamp to the component using one (1) M8*30 bolt. Then, using the other half of the tube clamp and the hardware provided in the clamp hardware bag, attach the backside of the tube clamp around the post.

3.5-inch 90-Degree Flat Clamp Install Example

Connect half of the flat clamp to one panel using one (1) M8*40 bolt. Then, using the other half of the flat clamp and the hardware provided in the clamp hardware bag, attach the other half of the tube clamp around the post. Then, attach the next panel to the other side of the clamp using the same process.

3.5-inch Clamp Installation Examples

3.5-inch Double Slide Clamp Install Example

Connect half of the double slide clamp to the double slide hood using one (1) M8*30 bolt. Then, using the other half of the clamp and the hardware provided in the clamp hardware bag, attach the backside of the double slide clamp around the post.

Square Deck Installation

STEP: 1

After the posts are in place, using four (4) M10*35 Bolts, eight (8) M10 Washers, and four (4) M10 Lock Nuts, attach each square deck to each pre-attached deck clamp as shown in the image.

Deck clamps are pre-attached to the posts and should not be altered in any way.

Triangle Deck Installation

STEP: 1

After the posts are in place, using three (3) M10*35 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the triangle deck to each pre-attached deck clamp as shown in the image.

Deck clamps are pre-attached to the posts and should not be altered in any way.

Rectangle Deck Installation

STEP: 1

After the posts are in place, using four (4) M10*35 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach the rectangle deck to each pre-attached deck clamp as shown in the image.

Deck clamps are pre-attached to the posts and should not be altered in any way.

Arch Bridge Installation

STEP: 1

Attach the Arch Bridge to the proper decks using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts for each deck.

STEP: 2

Then, once the bridge is in place, attach the Arch Bridge handrails to the posts using four (4) 3.5-inch tube clamps, and four (4) M8*30 bolts.

Then, attach the bottom of the handrails to the decks using one (1) M10*25 bolt, two (2) M10 washers, and one (1) M10 lock nut for each attachment point.

48" Transfer Station (3.5" post) Installation

STEP: 1

Connect the 4-foot Transfer Handrails to the designated posts using four (4) tube clamps, and four (4) M8*30 bolts. Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the top of the stairs to the deck. See the general installation guide regarding footing information for the handrail and set them into the ground.

STEP: 2

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the top of the stairs to the deck. Then using four (4) M10*30 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach the handrail to the bottom of the stairs.

4-foot Transfer Station Installation

STEP: 3

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the ADA transfer deck to the base of the 4-foot ADA transfer stair.

STEP: 4

See general installation guide regarding footing information for the transfer deck handrail & mount. Using two (2) M10*65 bolts, four (4) M10 washers, and two (2) M10 lock nuts, attach the transfer handrail to the ADA transfer deck.

4-foot Transfer Station Installation

STEP: 5

Using two (2) M10*25 bolts, four (4) M10 washers, and two (2) lock nuts, attach the transfer deck mount to the ADA transfer deck.

STEP: 6

See general installation guide regarding footing information for the ADA transfer step mount. Using four (4) M10 bolts, eight (8) M10 washers, and four (4) M10 lock nuts, attach the transfer step to the ADA transfer step mount.

4-foot Transfer Station Installation

STEP: 7

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 washers, attach the top of the ADA transfer step to the ADA transfer deck.

4-foot Double Straight Slide Installation

STEP: 1

Attach the deck climber extension to the proper deck using four (4) M10*25 bolts, eight (8) M10 washers, and four (4) M10 lock nuts.

STEP: 2

Then, See general installation guide regarding footing information for the double slide end mounts. Using two (2) M8*20 bolts, two (2) M8 spring gaskets, and two (2) M8 washers, attach the slide end mounts to the double slide.

4-foot Double Straight Slide Installation

STEP: 3

Then, attach the slide to the deck extension using four (4) M10*45 bolts, eight (8) M10 washers, and four (4) M10 lock nuts.

STEP: 4

Once the slide is attached, take the double slide hood and insert hood into the top of the slide, and then attach the top using two (2) double slide clamps, and two (2) M8*30 bolts.

4-foot Left Turn Slide Installation

STEP: 1

Take one (1) 3.5-inch flat clamp, and loosely attach it around a post using the bolts and nuts provided in the clamp hardware bag. Repeat this process on the other post. Then, use one (1) M8*40 bolt, one (1) M8 washer, and one (1) M8 lock nut to attach each side of the slide hood to each clamp. Leave bolts loose until slide is in place.

STEP: 2

See general installation guide regarding footing information for the slide end mount. Using two (2) M8*20, two (M8) spring washers. And two (2) M8 washers, attach the slide to the slide support post.

4-foot Left Turn Slide Installation

STEP: 3

See general installation guide regarding footing information for the middle slide support. Using two (2) M8*20 bolts, two (2) M8 spring washers, and two (2) M8 washers, attach the middle slide support post.

STEP: 4

Using one (1) M10*45 bolt, two (2) M10 washers, and two (2) M10 lock nuts, attach one side of the slide to the deck.

4-foot Left Turn Slide Installation

STEP: 5

Using one (1) M8*45 bolt, one (1) M8 washer, one (1) M12 washer, and one (1) M12 inner hex spiral nut, attach the slide to one side of the slide hood. Repeat this process for the other side of the slide.

4-foot Single Wave Slide Installation

STEP: 1

Take one (1) 3.5-inch flat clamp, and loosely attach it around a post using the bolts and nuts provided in the clamp hardware bag. Repeat this process on the other post. Then, use one (1) M8*40 bolt, one (1) M8 washer, and one (1) M8 lock nut to attach each side of the slide hood to each clamp. Leave bolts loose until slide is in place.

STEP: 2

See general installation guide regarding footing information for the slide end mount. Using two (2) M8*20, two (M8) spring gaskets. And two (2) M8 washers, attach the slide to the slide support post.

4-foot Single Wave Slide Installation

STEP: 3

Using one (1) M10*45 bolt, two (2) M10 washers, and two (2) M10 lock nuts, attach one side of the slide to the deck.

STEP: 4

Using one (1) M8*45 bolt, one (1) M8 washer, one (1) M12 washer, and one (1) M12 inner hex spiral nut, attach the slide to one side of the slide hood. Repeat this process for the other side of the slide.

Spiral Slide Kickplate Installation

STEP: 1

Attach the spiral slide kick plate to the proper square deck using four (4) M10*25 bolts, eight (8) M10 washers, four (4) M10 lock nuts.

STEP: 2

Attach the spiral slide deck to the top of the spiral slide kick plate using four (4) M10*25 bolts, eight (8) M10 washers, and four (4) M10 lock nuts.

Spiral Slide Installation

STEP: 3

Attach the Spiral Slide Deck Support Post to the Spiral Slide Deck using two (2) M10*25 Bolts, four (4) M10 Washers, and two (2) M10 Lock Nuts.

STEP: 4

Connect the Spiral Slide Mount to the bottom of the Spiral Slide using four (4) M10*20 Bolts, four (4) M10 Spring Gaskets, and four (4) M10 Washers. Refer to the General Installation Guide for information on slide footings.

Spiral Slide Installation

STEP: 5

See general installation guide regarding footing information for slides and support posts. Connect the Spiral Slide to the Spiral Slide Deck using three (3) M10*20 Bolts, three (3) M10 Spring Gaskets, and three (3) M10 Washers.

STEP: 6

Attach the Spiral Slide Handrail to the Spiral Slide Deck using five (5) M8*60 Bolts, five (5) M8 Washers, five (5) M12 Washers, and five (5) M12 Inner Hex Nuts. Connect spiral slide panels to slide using four (4) M8*40 bolts, four (4) M8 washers, four (4) M12 washers and four (4) M12 Inner Hex Nuts for each panel.

Connect the handrails to the posts using two (2) tube clamps. Repeat this process for the other handrail.

Sea Creature Climber Installation

STEP: 1

See general installation guide regarding footing information for the Sea Creature climber. Using two (2) M10*20 bolts, two (2) M10 spring gaskets, and two (2) M10 washers, attach the bottom of the Sea Creature climber to the climber support posts.

STEP: 2

Then using five (5) M10*20 bolts, five (5) M10 spring gaskets, and five (5) M10 washers, attach the top of the Sea Creature climber to the deck.

D-Rail Installation

STEP: 1

Take two (2) 3.5-inch tube clamps and connect half of the clamps both ends of the D-Rail using one (1) M8*30 bolt. Then, using the other half of the tube clamp and the hardware provided in the clamp hardware bag, attach the other half of the tube clamp around the post to the D-Rail. Repeat this process for the other D-Rail.

5-foot Vertical Ladder Installation

STEP: 1

See general installation guide regarding footing information for the 5-foot Vertical Ladder. Attach the ladder to the deck using two (2) M10*25 bolts, two (2) M10 spring washers, and two (2) M10 washers.

3.5-inch 2-Clamp Arch Rail Installation

STEP: 1

Attach the Arch Rail to the designated posts by connect half of the tube clamp to the arch rail using one (1) M8*30 bolt. Repeat this process for each post attachment point. Then, attach the rail to the deck using two (2) M10*25 bolts, four (4) M10 washers, and two (2) M10 lock nuts. Finally, attach the second half of the clamp around the post.

Pod Climber Installation

STEP: 1

See general installation guide regarding footing information for the pod climber. Attach the circle end mount to the bottom of the climber using the pre-attached hardware. Each attachment uses three (3) M10*20 bolts, three (3) M10 spring gaskets, and one (3) M10 large gaskets.

STEP: 2

Using three (3) M10*25 bolts, six (6) M10 washers, and three (3) M10 lock nuts, attach the pod climber to the deck.

3.5-inch Bubble Panel Installation

STEP: 1

Connect the bottom of the panel to the deck using two (2) M10*50 bolts, four (4) M10 washers, and two (2) M10 lock nuts. Then attach the top of the panel to the posts using two (2) flat clamps.

3.5-inch Gear Panel Installation

STEP: 1

Connect the bottom of the panel to the deck using two (2) M10*50 bolts, four (4) M10 washers, and two (2) M10 lock nuts. Then attach the top of the panel to the posts using two (2) flat clamps.

3.5-inch Tic Tac Toe Panel Installation

STEP: 1

Connect the bottom of the panel to the deck using two (2) M10*50 bolts, four (4) M10 washers, and two (2) M10 lock nuts. Then attach the top of the panel to the posts using two (2) flat clamps.

3.5-inch Line Panel Installation

STEP: 1

Connect the bottom of the panel to the deck using two (2) M10*50 bolts, four (4) M10 washers, and two (2) M10 lock nuts. Then attach the top of the panel to the posts using two (2) flat clamps.

Car Panel Installation

STEP: 1

Attach the Car Panel to the designated posts using four (4) 3.5-inch tube clamps, and four (4) M8*25 bolts.

Turn Crawl Tube Installation

STEP: 1

Take both sections of the crawl tube and attach them together using ten (10) M8*30 bolts, twenty (20) M8 washers, and ten (10) M8 lock nuts.

STEP: 2

Attach each end panel of to crawl tube to the designated posts using two (2) flat clamps for the top of the panels, and two (2) tube clamps for the bottom of the panels.

Bongos Installation

STEP: 1

Detach half of the tube clamps connected to the Bongos, and re-attach the clamp around the desired support post. Recommended install height is 20 to 36 inches above surfacing depending on age range.

Bench Panel Installation

Install four (4) Flat Clamps to the panel following the Clamp Installation Guide.

Attach two (2) Single Hole Mounts to the underside of the Bench Panel using the (x2) M10 Bolts and (x2) M10 Washers.

Rain Wheel Installation

Detach half of the tube clamp connected to the Rain Wheel, and re-attach the clamp around the support post, as shown in the picture.

Recommended install height is 20 to 36 inches above surfacing depending on age range.

We recommend using Thread-locking fluid on bolts connecting Rain wheel to clamp to prevent hardware from loosening over time.

(Thread-locker not supplied)

Single Drum Installation

Detach half of the tube clamps connected to the Single Drum, and re-attach the clamps around the support post, as shown in the image. Recommended install height is 20 to 36 inches above surfacing depending on age range.

We recommend using Thread-locking fluid on bolts connecting Single Drum to clamp to prevent hardware from loosening over time.

(Thread-locker not supplied)

Line Roof Installation

STEP: 1

Set the line roof on top of the posts. Take four (4) self-tapping screws and drill them through the notch at each corner of the roof, into the support posts.
