Stanley Convergent Security Solutions, is a UL listed fire and security alarm installation and maintenance company, submits the following description of work to be done at the above listed location.

Scope of Work

Replacing a defective Fire Alarm Control Panel (FACP) with the exact same type of panel like-for-like panel swap. This product is UL Fire and NFPA-72 compliant, and also has a built-in power supply and charger. The new FACP will be connected to the existing notification and signaling devices. Upon completion of the interconnection a test will be performed to verify that the zones and the signals are being received by the panel as-well-as the Alarm Center.

Thank you for this opportunity.
