Permit Application PRPF20250508 Narrative

As part of the elementary school development on the Puyallup campus, and as outlined in the CUP, CCS is requesting the installation of four additional double-classroom portables on site, adjacent to the Junior High School. These will include three dry double portables and one wet double portable, the latter of which will contain restrooms and a general classroom.

All four portables will be constructed and inspected by L&I, including compliance with energy requirements. However, due to the continuity requirements of the fire-rated wall, structural foundation, and ramp/landing, these components must be completed on-site and therefore should be reviewed by the local jurisdiction.

For your reference, we are including the manufacturer's drawings (to be submitted to L&I for approval). For this permit submittal, we are providing the site plan and fire-rated wall detail prepared by the Architect of Record, Jeff Brown. Also, this package includes structural elements as well as ramp and landing details.

Thank you,

Provide documentation regarding approval for the deconstructed wall and any other changes that will be made to the portable. As this will affect the approval by the state.
