The on-site sewage (septic) system as-built (construction drawing) and drinking water source for the above referenced property received final approval from the Tacoma-Pierce County Health Department on Oct 22, 2025.

Proper operation and maintenance of your on-site sewage system will extend the function of the system; avoiding expensive repairs, protecting public health and groundwater quality. If you would like additional information on the proper operation and maintenance of your on-site sewage system, visit our website at tpchd.org/septic. Go to OnlineRME.com to see your on-site sewage systems inspection and pumping reports.
