**Re: Third Party Review of 320 Tod Road NE Environmentally Critical Areas Assessment and Stream/Wetland Corridor Buffer Restoration Program**

Dear Nabila:

Confluence Environmental Company (Confluence) has reviewed the Stream/Wetland Corridor Buffer Restoration Program report dated March 11, 2205 (Restoration Program, Habitat Technologies 2025). The revised report was submitted by Habitat Technologies for the 320 Todd Road NE CUP project (PLCUV20240004) located at 320 Todd Road NE, Puyallup, Washington (Parcels 0420222005).

## **CAA**

### **Completeness Review**

Confluence found that the CAA was complete according to the regulations outlined for critical areas reports in Puyallup Municipal Code (PMC) Chapter 21.06.

### **Previous Request For Revised Information**

In our technical review of the previously submitted wetland rating form, we found several instances of disagreements that have been addressed in the CAA. Confluence concurs with the revised rating forms, wetland categorization, and buffer.

## **Technical Review**

Confluence concurs with the conclusions of the CAA.

## **RESTORATION PROGRAM**

### **Completeness Review**

Confluence found that the Restoration Program was complete according to the regulations outlined for critical areas reports in PMC Chapter 21.06.610, 620, and 630.

## Technical Review

Confluence has determined that the revised report has met the technical requirements of PMC Chapter 21.06.610, 620, and 630.

If you have any comments or questions, please feel free to contact me.

Respectfully yours,
