Bradley Heights Project - Public Comments

Permit #PLPSP20220049

Commenter: Louis Hopkins

Comment: Mr. Hopkins spoke with the case Planner on 5/17/2021 to express concerns about height of the proposed buildings. He stated that since his house is directly abutting the project, he is concerned that the 3-4 story tall buildings will enable residents of the multi-family project to look from their balconies/windows into his backyard. He is also concerned that the required landscape buffers surrounding the property will not be adequate to alleviate this impact.
