Comments:

- Concerns about condition of Inter Ave in front of project site. The roadway is not improved to City standards and is very narrow.
- Concerns about safety of vehicles parking in ROW. Employees of Pro Vac and other businesses in the area park on both sides of narrow Inter Ave, further narrowing the already narrow drive lanes.
- The intersection of 23rd and E main becomes backed up with cars, especially during rush hour when employees of the businesses in the area are leaving work. The addition of the Pro Vac business will add more vehicles to this problem.
