DECLARATIONS

- "I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Sec. 312.10 of 40 CFR Part 312."*
- "I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I performed and/or developed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."*

*A person who does not qualify as an Environmental Professional may assist in the conduct of all appropriate inquiries in accordance with ASTM E 1527-05, if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional when conducting such activities.

EXECUTIVE SUMMARY

This report summarizes the results of the All Appropriate Inquiries (AAI) Phase I Environmental Site Assessment (ESA) of the existing

AOB parking lot site located at 330 3rd Street SW in Puyallup, Washington. Based on the results of this Phase I ESA, we have identified the following recognized environmental conditions (RECs) for the subject property:

- There is a potential for unknown heating oil underground storage tanks (USTs) related to former residential and commercial buildings at the subject property based on common historical practices in the area. While evidence of petroleum hydrocarbons was not encountered during recent geotechnical explorations at the subject property (Section 2.5), we cannot exclude the possibility that heating oil USTs may be present in unexplored locations elsewhere at the site.
- A gas station known as Pioneer Food & Gas was formerly located northeast (downgradient) of the subject property across the intersection of Pioneer Way and 3rd Street SW. According to a 2010 letter in the Ecology file from Tacoma-Pierce County Health Department (TPCHD) regarding the former Pioneer Food & Gas site, additional subsurface characterization is recommended to more fully delineate the extent of contamination at the site and is considered a REC per the ASTM definition. However, the likelihood for migratory contamination to extend from the Pioneer Food & Gas site to the subject property currently appears low based on the distance and estimated groundwater flow direction in the area.

In our opinion, there is a low potential for soil and/or groundwater contamination resulting from the above conditions. Further evaluation of this potential would require additional research and/or explorations and sampling of soil and groundwater, and does not appear warranted at this time. City of Puyallup may consider creation of a contingency plan in the event that unknown USTs and/or petroleum-impacted soil and groundwater are encountered during site redevelopment activities.

This Executive Summary should be used only in the context of the full report for which it is intended.

1.0 INTRODUCTION

This report summarizes the results of our Phase I Environmental Site Assessment (ESA) completed for the City of Puyallup at the AOB site parking lot property located at 330 3rd Street SW in Puyallup, Washington. The City of Puyallup is considering redevelopment of the property. The property is herein referred to as the “subject property.” The subject property is shown relative to surrounding physical features on the Vicinity Map, Figure 1. The layout of the subject property and surrounding properties is shown on the Site Plan, Figure 2.

Our study was completed at the request of Mr. Dan Handa, City of Puyallup Engineer. We understand that the results of this Phase I ESA will be used by the City of Puyallup as part of their evaluation of potential environmental liabilities associated with ownership and redevelopment of the subject property. GeoEngineers also recently completed a geotechnical engineering study for the subject property. The results of the geotechnical engineering study are reported under separate cover.

1.1 Phase I Scope of Services

The purpose of this Phase I ESA was to identify recognized environmental conditions¹ (RECs) in connection with the subject property. Our scope of services was in general accordance with ASTM International (ASTM) Standard E 1527-05 for Phase I ESAs and the U.S. Environmental Protection Agency’s (EPA’s) Federal Standard 40 CFR Part 312 “Standards and Practices for All Appropriate Inquiries (AAI),” which are intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The standard outlines the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined by 42 U.S.C. §9601. Our services, described below, were completed in general accordance with our scope of work dated July 7, 2011. These services were completed by, or under the direction of, an environmental professional as described in 40 CFR Part 312.

Our specific scope of services for this Phase I ESA was as follows.

1. Reviewed readily available geotechnical reports, environmental reports and/or other relevant documents pertaining to environmental conditions at the subject property.
2. Reviewed the results of a federal, state, local and tribal environmental database search provided by an outside environmental data service for listings of properties with known or suspected environmental concerns on or near the subject property within the search distances

¹ Recognized environmental conditions are defined in ASTM E 1527-05 as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

specified by ASTM. Our database and file review search also included a review of EPA and Washington State Department of Ecology (Ecology) websites for readily available information (publications and reports) concerning areawide soil and groundwater contamination on or adjacent to the subject property. Evaluate the possibility for a vapor encroachment condition on the property generally as outlined in ASTM Standard E 2600-10 and state our opinion regarding possible vapor encroachment conditions where noted.

3. Reviewed regulatory agency files regarding listed properties of potential environmental concern relative to the subject property.
4. Identified a key site manager with specific knowledge of past and present property use and request that the key site manager meet a GeoEngineers' representative on-site for an interview during the visual site reconnaissance and/or an interview by telephone if he or she is not available during the site reconnaissance. We also identified and interviewed others familiar with the use and history of the subject property, as available and appropriate, including representatives of current occupants that likely use, store, treat, handle or dispose of hazardous substances now or in the past.
5. Interviewed a representative of the local fire department, health department and/or Ecology as necessary to gather information or fill data gaps regarding the history of the subject property and surrounding properties relative to the likely presence of hazardous substances.
6. Reviewed historical aerial photographs, fire insurance maps, building department records, city directories, chain-of-title reports, and land use and tax assessor records, as available and appropriate, to identify past development history on and adjacent to the subject property relative to the possible use, generation, storage, release or disposal of hazardous substances. We attempted to identify uses of the subject property from the present back to the time that records show no apparent structures on the subject property, back to the time that the property was first used for residential, agricultural, commercial, industrial or governmental purposes, or back to 1940, whichever is earliest.
7. Reviewed current United States Geological Survey (USGS) topographic maps to identify the physiographic setting of the subject property and provide a statement on the local geologic, soil and groundwater conditions based on our general experience and sources such as geologic maps and soil surveys.
8. Conducted a visual reconnaissance of the subject property and adjacent properties to identify visible evidence of RECs.
9. Identified the source(s) of potable water for the subject property and current heating and sewage disposal system(s) used at the subject property, if any, and their age if readily ascertainable.
10. Identified data gaps relative to the Phase I ESA study findings.
11. Provided this written summary of the Phase I ESA results and identified RECs along with our opinion and recommendations regarding the potential for contamination by hazardous substances at the subject property and the significance of any data gaps identified.

1.2 Special Considerations

Our scope of services did not include an environmental compliance audit or an evaluation for the presence of lead-based paint, mold, polychlorinated biphenyls (PCBs) in light ballasts, radon, lead in drinking water, asbestos-containing building materials, urea-formaldehyde insulation or debris or other potentially hazardous building materials, or an assessment of vapor intrusion into structures on the property per ASTM Standard E 2600-08 because no on-site structures currently exist on the subject property. Soil, groundwater or surface water sampling was not part of our Phase I ESA services.

1.3 Qualifications of Environmental Professional

Terry McPhetridge is a licensed geologist (LG) and licensed hydrogeologist (LHG) in Washington (#1020) and has 23 years of full-time experience conducting Phase I ESAs. Terry is an Environmental Professional per 40 CFR Part 312. Jessica Robertson is a licensed geologist (LG) in Washington (#2570) and has 8 years of experience doing Phase I ESAs. Jessica is an Environmental Professional per 40 CFR Part 312.

2.0 PROPERTY DESCRIPTION

2.1 Involved Parties

The subject property is currently owned by the City of Puyallup. The City of Puyallup is considering redevelopment of the property.

2.2 Location, Legal Description and Setting

General information, property use(s) and environmental setting of the subject property area are summarized in Table I below. The location is shown relative to surrounding physical features in Figure 1. The current layout of the subject property and surrounding property uses are shown in Figure 2. Photographs of the subject property are shown in Figures 3 and 4.

TABLE I. SUBJECT PROPERTY INFORMATION

Topographic Map	USGS, 7.5 minute Puyallup, Washington topographic quadrangle map dated 1997.
Quarter, Section, Township and Range	SE quarter of Section 28, Township 20, Range 4, Willamette Meridian
Address	Address of the most recent former building at the property was 330 3 rd Street SW, Puyallup, Washington. Previous buildings at the building also used other even street numbers between 300 and 330 3 rd Street SW.
General Location	Southwest corner of intersection of West Pioneer Way and 3 rd Street SW in Puyallup, Pierce County, Washington. Subject property is bound by West Pioneer Way on the north, 3 rd Street SW on the east, and commercial and residential property to the south and west.
Legal Description	Abbreviated legal description per Pierce County Assessor: Section 28 Township 20 Range 04 Quarter 41 MEEKERS 1ST & 2ND: MEEKERS 1ST & 2ND NE OF SE 28-20-04E PARCEL

Tax Parcel Number	Pierce County Parcel 5745001371
Approximate Area	1.11 acres
Existing Use(s)	Parking Lot
Geologic Setting	Puget Sound Lowland/Puyallup River Floodplain
Nearest Surface Water Bodies	Puyallup River approximately one-half mile to the northeast.
Approximate Surface Elevation	40 feet above mean sea level
Soil and Geologic Conditions	Glacial outwash and alluvium (river deposits) consisting of sands and gravels based on recent geotechnical explorations at the subject property and Geologic Map of the Puyallup 7.5-minute Quadrangle (Troost, 2006).
Depth to Groundwater	Within 10 feet of the ground surface based on information obtained from recent geotechnical subsurface explorations completed at the subject property.
Inferred Direction of Shallow Groundwater Flow	To the northeast, based on surface topography and information presented in reports for nearby property.

Our knowledge of the general physiographic setting, geology and groundwater occurrence in the vicinity of the subject property is based on our review of the maps and sources listed above, our recent geotechnical explorations at the subject property, and our general experience in the area.

2.3 Site Reconnaissance

2.3.1 Summary of Observations

A representative of GeoEngineers performed a visual reconnaissance of the subject property on August 18, 2011. Mr. Dan Handa, City of Puyallup Engineer, was identified as a “key site manager” with knowledge of the property use, but was unable to meet our representative on site. Our interview with Mr. Handa was completed by telephone and is summarized in Section 4.0.

The subject property was accessed from adjacent streets. The subject property is currently entirely developed as an asphalt-paved parking lot. Table II below summarizes conditions observed during our site reconnaissance. Section 2.3.2 contains additional details regarding conditions of potential environmental significance observed during our site reconnaissance and a summary list of potential RECs identified by this portion of our study. The approximate locations of the observed features discussed in this section are shown in Figure 2. Photographs of the subject property were taken to document observations made during our reconnaissance and selected photographs are presented in Figures 3 and 4.

TABLE II. SUMMARY OF SITE RECONNAISSANCE OBSERVATIONS

Features	Observed		Comment
	Yes	No	
Structures (existing)		X	
Structures (evidence of former)	X		An area of concrete patch (building foundation) in the southeast corner of the site marks the former location of the City of Puyallup Public Works building.
Heating/Cooling System		X	
Floor Drains, Sumps or Drywells		X	
Aboveground Storage Tanks (ASTs)		X	
Underground Storage Tanks (USTs) or Evidence of USTs		X	
Drums or Other Containers		X	
Chemicals or Hazardous Materials (other than <i>de minimis</i> quantities of cleaning products)		X	
Evidence of Leaks, Spills or Releases Surrounding ASTs, USTs and/or Chemical Storage Areas		X	
Stained or Corroded Floors, Walls or Drains (other than apparent water stains or minor oil stains on pavement from parked vehicles)		X	
Pipes of Unknown Origin or Use		X	
On-site Septic System		X	
Sewage Disposal System		X	Municipal sewer connection available.
Potable Water Supply		X	Municipal water supply available.
Solid Waste Refuse Dumpsters		X	
Hydraulic Hoists		X	
Oil/Water Separators		X	
Discolored or Stained Soil or Vegetation Potentially from Hazardous Substances		X	
Hazardous Waste Disposal Areas		X	
Uncontained Debris, Refuse or Unidentified Waste Materials		X	
Standing Water or Other Liquids		X	
Catch Basins and Stormwater Drainage	X		Standard municipal catch basins in the asphalt parking area are reportedly connected to the municipal storm sewer system.
Pits/Ponds/Lagoons		X	
Waste or Wastewater Discharges		X	

Features	Observed		Comment
	Yes	No	
Unusual Odors		X	
Stressed Vegetation		X	
Fill Material		X	
Water Wells (agricultural, domestic, monitoring)		X	
Pad-Mounted Transformers		X	
Pole-Mounted Transformers	X		Pole-mounted transformers were observed on two adjacent utility poles. No staining was observed on or around the utility poles beneath the transformers.
Other Conditions of Environmental Concern		X	

2.3.2 Findings

Potential RECs were not identified by this portion of the study.

2.3.3 Data Gaps

Data gaps were not identified by this portion of the study.

2.4 Adjacent Property and Vicinity Observations

2.4.1 Summary of Observations

We viewed properties located adjacent to and surrounding the subject property on August 18, 2011 from accessible public rights-of-way and the subject property. We did not enter adjacent properties or buildings. The subject property generally is situated in an area that is heavily developed with commercial, residential, governmental, and utility uses. Section 2.4.2 contains additional details regarding conditions of potential environmental significance observed during our site reconnaissance and a list of potential RECs identified by this portion of our study. Table III below outlines adjacent land uses and pertinent observations with respect to conditions that could pose a REC on the subject property. Figure 2 shows adjacent property uses and locations in relation to the subject property.

TABLE III. ADJOINING STREETS AND ADJACENT PROPERTIES OBSERVATIONS

Direction	Adjoining Street	Position Relative to Subject Property ¹	Adjacent Property and Use	Comments
North	West Pioneer Way	Downgradient/ Crossgradient	City of Puyallup Public Safety Building (Fire Station) Post office to northeast	An old sign posted at the post office property reads "Pioneer Food & Gas". Pioneer Food & Gas is an Ecology-listed site and is further discussed in Section 3.0.
South	None	Upgradient	Residential	None

East	3 rd Street SW	Crossgradient	Pioneer Park Activity Center and Qwest facility	None
West	None	Upgradient/ Crossgradient	Funeral Home and single-family residential	None

Note:

¹ The inferred shallow groundwater flow direction in the vicinity of the subject property is toward the northeast, as described in Section 2.2.

2.4.3 Findings

Potential RECs were not identified by this portion of the study with the exception of likely petroleum use/storage at the former Pioneer Food & Gas site to the northeast of the subject property. The Pioneer Food & Gas site, as well as other adjacent sites including the Pioneer Park Activity Center and Public Safety Building, are Ecology-listed sites as discussed in more detail in Section 3.0.

2.4.2 Data Gaps

Data gaps were not identified by this portion of the study with the exception of the following.

The basic property research conducted for this study did not provide readily available information regarding the past or present use of heating oil UST or AST systems on the adjacent properties. This data gap is not considered significant because current or past use of heating oil on these properties is assumed to be a likely possibility.

2.5 Previous Reports

2.5.1 Summary of Previous Reports

Our research did not identify prior geotechnical or environmental reports pertaining to the subject property. GeoEngineers is currently completing a geotechnical survey report for the subject property that will be submitted under separate cover. GeoEngineers' recent geotechnical work at the property consisted of the completion of three soil borings. Two of the borings (B-1 and B-2) were completed to depths of approximately 21.5 feet below ground surface (bgs); the third boring (B-3) was completed to a depth of approximately 80 feet bgs. Groundwater was encountered in the borings at approximately 7 feet bgs. No odors or staining possibly indicative of contamination were noted on any soil samples obtained from the geotechnical borings.

2.5.2 Findings

Potential RECs were not identified by this portion of the study.

2.5.3 Data Gaps

Data gaps were not identified by this portion of the study.

3.0 ENVIRONMENTAL RECORDS REVIEW

3.1 Database Search

GeoEngineers reviewed the results of a search of pertinent environmental regulatory lists and databases for current or previous facilities listed at addresses located within ASTM-specified

distances from the subject property. The search was performed on August 17, 2011. The information reviewed was provided by a subcontracted regulatory list search service, Environmental Data Resources, Inc. (EDR). The EDR report is presented in Appendix B. The report includes details regarding the listed facilities identified and maps showing the approximate locations of the listed facilities relative to the subject property. Section 4.0 of this report includes information regarding historical gas stations and dry cleaners based on EDR's proprietary historical city directory database. Those listings (see Appendix B) are not included here in Section 3.0 unless the historical facilities are also listed in regulatory agency databases as known or suspected contaminated sites.

GeoEngineers reviewed the search results for listings pertaining to the subject property. GeoEngineers also reviewed EDR listing of database entries that could not be mapped by EDR because of insufficient addresses (orphans). Off-site facilities found within the specified distances from the subject property were evaluated for potential impact to the subject property.

The subject property was not listed. Table IV below summarizes the listed facilities that in our opinion could pose a REC to the subject property. Other listed facilities identified in Appendix B either are located a significant distance from the subject property or are located in an inferred down- or crossgradient position relative to the subject property and are unlikely to pose a potential environmental concern to the subject property, in our opinion.

TABLE IV. SUMMARY OF REGULATORY DATABASE SEARCH LISTINGS OF POTENTIAL ENVIRONMENTAL CONCERN

Location	Listed Business	Listed Address	Regulatory Database	Description
Adjacent north (downgradient/crossgradient) approximately 50 feet across West Pioneer Way	Public Safety Building (aka Fire Station)	311 West Pioneer Way	Independent Cleanup Report (ICR), UST, Leaking UST (LUST), Confirmed and Suspected Contaminated Sites List	Two USTs were formerly in use at the site. Leaks from the USTs to site soils were reportedly cleaned up. We reviewed Ecology's files for this listing as further discussed in Section 3.2.
Adjacent east (crossgradient) approximately 50 feet across 3 rd Street SW	Pioneer Park Activity Center and Condominiums (aka 202, 212 & 218 West Pioneer Way)	218 West Pioneer Way	UST, CSCSL No Further Action (NFA), Voluntary Cleanup Program (VCP)	Three USTs were formerly in use at the site. Leaks from the USTs to site soils were reportedly cleaned up. We reviewed Ecology's files for this listing as further discussed in Section 3.2.
Adjacent northeast (downgradient), approximately 80 feet across intersection of West Pioneer Way and 3 rd Street	Pioneer Food & Gas	203 Pioneer Way	CSCSL, UST, LUST, ICR	Four USTs were formerly in use at the site. Leaks from the USTs to site soil and groundwater are reportedly awaiting cleanup. We reviewed Ecology's files for this listing as further discussed in Section 3.2.

Location	Listed Business	Listed Address	Regulatory Database	Description
Adjacent east (crossgradient), approximately 50 feet across 3 rd Street SW	Qwest Corporation	317 3 rd Street SW	UST	Three USTs were formerly in use at the site. All tanks have either been removed or closed-in-place. Because no leaks from the tanks have been identified and Ecology's file information is minimal, we did not review Ecology files for this listing.

3.2 Review of Regulatory Files

We reviewed Ecology's files for the listings identified in Section 3.1. Our file review was performed on August 25, 2011. A summary of pertinent information follows.

3.2.1 Public Safety Building, 311 West Pioneer Way

The Public Safety Building (Puyallup Fire Station) is located approximately 50 feet north of the subject property across West Pioneer Way. Two 300-gallon diesel USTs associated with a backup generator on the southeast corner of the building were encountered and removed during building remodeling activities based on information provided in a 1992 UST removal report included in the Ecology file. One of the two USTs was deteriorated with visible corrosion holes. Composite soil samples from the sidewalls of the UST excavation did not contain detectable concentrations of petroleum hydrocarbons, however, the report did not include any discussion of excavation depths, groundwater at the site, or any site plan showing the former UST locations. The removed USTs associated with the Public Safety Building do not currently appear to present REC to the subject property at this time based on the cleanup status identified in the EDR and the subject property is located upgradient of the Public Safety Building site.

3.2.2 Pioneer Park Activity Center and Condominiums (aka Puyallup Activity Center) 202, 212 & 218 West Pioneer Way

The Pioneer Park Activity Center mixed-use building is located approximately 50 feet east of the subject property across 3rd Street SW. Ecology files for this site contain a variety of reports and correspondence dated 2005 through 2008. According to information provided in these documents, petroleum-contaminated soil was identified in association with fuel and heating oil USTs at the site in the early 2000s. In 2005, petroleum-contaminated soil was excavated from the site and several groundwater monitoring events were completed at the site. Petroleum hydrocarbons were either not detected or were detected at concentrations less than the applicable Model Toxics Control Act (MTCA) Method A cleanup levels in all groundwater samples obtained from the site. Results of groundwater monitoring activities also indicated that groundwater flows to the northeast beneath the site. Ecology granted "No Further Action" status to the site in January 2008. The site has since been redeveloped into a multi-use building. The Pioneer Park Activity Center property does not currently appear to present a REC to the subject property based on the NFA status and subsequent site redevelopment.

3.2.3 Pioneer Food & Gas, 203 Pioneer Way

The Pioneer Food & Gas site, now a portion of a post office facility, is located approximately 80 feet northeast of the subject property across the intersection of West Pioneer Way and 3rd Street SW. Ecology files for the site included reports and correspondence dated from the late 1990s through 2010. According to information provided in these documents, five USTs were removed from the former gasoline service station site in May and June 1991, including one 110-gallon waste oil UST located southwest of the store building and four gasoline USTs ranging in size from 2,000 to 5,000-gallons located on the east side of site and east of pump islands. Petroleum-contaminated soil was identified in excavation sidewalls but the impacted soil was re-used to fill the excavation pit after plastic sheeting was placed along the boundaries of the excavation pit.

In 2001, a subsurface investigation consisting of nine soil borings was completed at the site to help define the extent of soil and groundwater contamination at the site. Gasoline-range petroleum hydrocarbons and benzene were detected at concentrations greater than the applicable MTCA Method A cleanup levels in soil and groundwater samples at several locations across the site. Groundwater was encountered in the borings at approximately 6 feet bgs.

Reports after 2001 were typically not included in the Ecology file, however, a November 2010 letter from Tacoma-Pierce County Health Department (TPCHD) states that a September 28th 2010 Geophysical Survey and Supplemental Subsurface Exploration Report performed by Environmental Associates was reviewed by TPCHD. The TPCHD letter also states that the TPCHD concurs with the recommendation in the report that further characterization of extent of contamination in soil and groundwater at the site be completed along with design and implementation of a remediation strategy as the site owner must demonstrate that all contamination has been characterized and remediated and work plan must be submitted to TPCHD prior to site closure.

We contacted Rob Olson, Environmental Health Specialist with TPCHD on September 8, 2011 regarding the Pioneer Food & Gas site. Mr. Olson provided excerpts of the September 2010 report referenced in the available Ecology documents. According to information provided in these documents, petroleum-contaminated soil remains beneath much of the center portion of the site as well as in the southwest corner. Groundwater flow direction beneath the Pioneer Food & Gas site is reportedly generally to the north.

The Pioneer Food & Gas site currently appears to present a low potential for migratory contamination to the subject property based on available information regarding the former UST locations at the site and the downgradient location of the site from the subject property although available documents regarding the Pioneer Food & Gas site indicate that further evaluation into the extent of contamination at the site is warranted.

3.3 Review of Areawide Contamination Reports

We conducted a search of Ecology and EPA websites for readily available information (publications and reports) that may concern areawide soil and groundwater contamination on or adjacent to the subject property. Areawide contamination reports pertaining to the subject property vicinity were not identified.

3.4 Findings

Potential RECs identified by this portion of the study are listed below:

- Available documents regarding the Pioneer Food & Gas site northeast of the subject property indicate that further evaluation into the extent of contamination at the site is warranted and is currently considered a REC according to the ASTM definition. However, based on available information regarding the former UST locations at the site and the downgradient location of the site from the subject property, the Pioneer Food & Gas site currently appears to present a low potential for migratory contamination to extend to the subject property.

3.5 Data Gaps

Data gaps were not identified for this portion of the report, with the exception of the following:

- According to a 2010 letter in the Ecology file from TPCHD regarding the former Pioneer Food & Gas site, additional subsurface characterization is recommended to more fully delineate the extent of contamination at the site. However, based on downgradient distance from the subject property to the Pioneer Food & Gas site, the likelihood for migratory contamination to extend from the Pioneer Food & Gas site to the subject property currently appears low.

4.0 PROPERTY HISTORY

4.1 Historical Resources

Our understanding of the history of the subject property is based on a review of the information from the historical resources listed in Table V and interviews with the individuals listed. Selected historical research documents are included in Appendix C.

TABLE V. HISTORICAL RESOURCES REVIEWED

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment (See Section 4.2 for findings)
Historical Aerial Photographs ¹	Environmental Data Resources, Inc. (EDR)	1941, 1957, 1968, 1972, 1980, 1986, 1990, 2005, and 2006	8/18/2011	None
Historical Fire Insurance Maps	EDR search of Sanborn maps	1888, 1891, 1894, 1900, 1909, 1912, 1927, 1945, and 1964	8/17/2011	None
Historical Tax Assessors Records	Washington State Archives	1940s to 1980s	8/30/2011	None
Historical City Directories	EDR search at public libraries	Approximate five-year intervals, 1959 to 2011	8/19/2011	None

Description	Provider or Interviewee	Dates of Coverage or Dates of Knowledge of the Property	Date Reviewed or Contacted	Comment (See Section 4.2 for findings)
Historical Topographic Maps	EDR search	1900, 1944, 1949, 1961, 1968, 1973, 1981, 1994, and 1997	8/17/2011	None
Building Department and Land Use Records	City of Puyallup	1990s to recent	8/18/2011	None
County Assessor Records	Pierce County Assessor website	Recent	8/17/2011	None
Title Report	N/A	N/A	N/A	A chain-of-title or title report was not provided for our review by the City of Puyallup
Interview	Dan Handa, City of Puyallup Engineer and "Key Site Manager"	Recent	8/18/2011	None
Interview	Rob Olson, TPCHD	Recent	9/8/2011	Mr. Olson provided information regarding the adjacent Pioneer Food & Gas site. TPCHD does not have any information regarding the subject property.
Interview	City of Puyallup Fire Department	Recent	9/8/2011	As of this completion of this report, Puyallup Fire has not yet responded to our request for information regarding the subject property.

Note:

¹ The scale of the photographs reviewed allowed for an interpretation of general property development/configuration, such as identifying most structures, roadways and clearings. However, the scale of the photographs did not allow for identification of specific property features, such as fuel pumps, wells or chemical storage areas on the subject property, if any.

4.2 Historical Property Ownership and Use Summary

The available historical sources indicate that the subject property was formerly multiple parcels owned by private parties and banks in the 1950s and Albertson's, Inc. and Mr. Ronald DeBock in the 1970s. The DeBock parcel was owned by St. Helens Office Center in 1985. The property was purchased in sections by the City of Puyallup in the early 1980s. Property ownership prior to the 1950s was not included in the available historical resources.

Based on the historical research, the subject property was first developed with small residential buildings in the 1890s. Sanborn maps dated 1891 through 1945 show several small single-family homes on the property with associated outbuildings, as well as a two-story, three-apartment residential building on the south end of the property at 330 3rd Street SW. Minimal information is available regarding the small residential buildings formerly located at the property. The layout of

the apartment building at 330 3rd Street SW, identified in city directories from 1959 through 1979 as “St. Helens Apartments”, appears to remain generally unchanged in Sanborn maps from 1927 through 1964. City of Puyallup permits indicate that the 330 3rd Street SW building was converted from apartments to offices in 1983. City directory records indicate that the building was used as a real estate office in 1984 and as Washington State Employment Services (WSES) office in the late 1980s. The City of Puyallup occupied the building in the early 1990s as a City Building, Planning, and Public Works offices from the early 1990s until approximately 2007 when the building was demolished. The original heat source for the 330 3rd Street SW building is not identified in available historical documents; according to City of Puyallup building department records, the building used an electric heat pump system in 1988 and electric HVAC system in 1992.

Residential buildings located north of the 330 3rd Street SW building were demolished in the 1950s prior to construction of a large grocery store building at 312 3rd Street SW in approximately 1959. The grocery store building extended across both the center section of the subject property and the currently-adjacent property immediately to the west based on our review of 1964 Sanborn map and aerial photographs from the 1960s through 1980s. City directories indicate that the grocery store operated as Tradewell Stores in 1959, Albertson’s grocery in the 1960s, Food King in the 1970s, and Puyallup IGA foods in the 1980s. The grocery store building was demolished in 1991 according to City of Puyallup building permits. “King Size Photo Service” is also listed at the grocery address in 1979 and 1984 city directories. The heat source for the grocery building and the location and nature of the on-site photo processing facility are unknown.

According to Mr. Dan Handa, there are no USTs or ASTs at the subject property, and there have been no leaks, spills or releases of hazardous substances or petroleum at the subject property to the best of Mr. Handa’s knowledge.

4.3 Adjacent Properties

Adjacent properties generally were developed for residential purposes before the early 1900s.

North. The existing Public Safety Building to the north of the subject property was originally built in 1968 with additions and renovations in 1990 and 1994. Small residential buildings and stores are shown on the north-adjacent property in 1964 and earlier Sanborn maps. Existing post office building and service station to the northeast (former Pioneer Food & Gas, see Section 3.0) was built in 1971. A church was formerly located on the current post office parking lot in the 1945 Sanborn map.

East. The existing Qwest Telecommunications building due west of the subject property was constructed in 1970 according to county assessor information. This property is shown as a phone company building in a 1964 Sanborn map. The existing Puyallup Activity Center building north of the Qwest building is recently constructed (2006) and replaced several buildings previously located on this property that included a City Hall building, fire department facility, and gas station. These are all also visible in the 1964 Sanborn map and more recent aerial photographs dated through 1990.

South. Adjacent houses to the south were built in the 1940s.

West. The existing funeral home building was built in 1997. As noted above, the grocery store building formerly located on the subject property extended onto what is now west-adjacent property. Existing small houses to the southwest were built between the 1910s and 1950s.

4.4 Environmental Liens or Property Use Restrictions

During the course of our research, we did not find that environmental liens had been filed against the subject property.

4.5 Information Provided by User/User Obligations

We received responses to a user questionnaire, a copy of which is provided in Appendix A. According to the responses from the user-provided information (for example, title records, environmental liens, specialized knowledge of the subject property, etc.), the user did not provide any specific findings that would suggest a REC or potential REC relative to the subject property.

4.6 Findings

Potential RECs identified by this portion of the study are listed below:

- There is a potential for unknown heating oil USTs related to former residential and commercial buildings at the subject property following development based on common historical practices in the area. While evidence of petroleum hydrocarbons was not encountered during recent geotechnical explorations at the subject property (Section 2.5), we cannot exclude the possibility that heating oil USTs may be present in unexplored locations elsewhere at the site.

4.7 Data Gaps

Three data gaps were identified by this portion of the study.

- As of the completion of this report, the Puyallup Fire Department has not responded to our request for information regarding records of USTs or hazardous materials/incidents on the subject property. Based on the results of other portions of the property history that did not identify these features at the subject property, and the likely recent nature of most fire department records on file, we consider the significance of this data gap to be low.
- No reasonably ascertainable information was available to confirm the absence or presence of any heating oil USTs or past heating oil ASTs at the subject property, which are considered possible/likely based on the age and type of property development. As a result of this data gap, the possible presence of undocumented heating oil USTs represents a potential REC to the subject property.
- We were not provided a copy of the title report for the subject property; as such, this is considered a data gap. However, based on information provided by the user (Section 4.6) and previous work at the property, we did not identify environmental liens or activity and use limitations on record for the subject property, and we consider the significance of this data gap to be low.

5.0 CONCLUSIONS

GeoEngineers has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527 of the existing AOB parking lot site located at 330 3rd Street SW in Puyallup, Washington. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of RECs in connection with the subject property except for the following.

- There is a potential for unknown heating oil USTs related to former residential and commercial buildings at the subject property based on common historical practices in the area. While evidence of petroleum hydrocarbons was not encountered during recent geotechnical explorations at the subject property (Section 2.5), we cannot exclude the possibility that heating oil USTs may be present in unexplored locations elsewhere at the site.
- A gas station known as Pioneer Food & Gas was formerly located northeast (downgradient) of the subject property across the intersection of Pioneer Way and 3rd Street SW. According to a 2010 letter in the Ecology file from TPCHD regarding the former Pioneer Food & Gas site, additional subsurface characterization is recommended to more fully delineate the extent of contamination at the site and is considered a REC per the ASTM definition. However, based on downgradient distance from the subject property to the Pioneer Food & Gas site, the likelihood for migratory contamination to extend from the Pioneer Food & Gas site to the subject property currently appears low based on the groundwater flow direction.

In our opinion, there is a low potential for soil and/or groundwater contamination resulting from the above conditions. Further evaluation of this potential would require additional research and/or explorations and sampling of soil and groundwater, and does not appear warranted at this time. The City of Puyallup may consider creation of a contingency plan in the event that unknown USTs and/or petroleum-impacted soil and groundwater are encountered during site redevelopment activities.

6.0 LIMITATIONS

This Phase I ESA has been prepared for use by the City of Puyallup. GeoEngineers has performed this Phase I ESA of the AOB parking lot site located at 330 3rd Street SW in Puyallup, Washington in general accordance with the scope and limitations of our scope of work dated July 7, 2011 and ASTM E 1527-05, Standard Practice for Phase I ESAs and EPA's Federal Standard 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries (AAI)."

Within the limitations of scope, schedule and budget, our services have been executed in accordance with the generally accepted environmental science practices for Phase I ESAs in this area at the time this report was prepared. No warranty or other conditions, express or implied, should be understood.

Any electronic form, facsimile or hard copy of the original document (email, text, table, and/or figure), if provided, and any attachments are only a copy of the original document. The original document is stored by GeoEngineers, Inc. and will serve as the official document of record.

Please refer to Appendix D titled “Report Limitations and Guidelines for Use” for additional information pertaining to use of this report.

We appreciate the opportunity to be of service to the City of Puyallup. Please call if you require more information or have questions regarding this report.

APPENDIX A
Completed User Questionnaire

PHASE I ESA USER QUESTIONNAIRE

To enable us to complete the Phase I ESA and for the user of this report to be potentially eligible for one or more of the federal landowner liability protections, please complete the questionnaire below and provide the additional information requested.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal and state or local law?

YES NO DON'T KNOW Explain: _____

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

YES NO DON'T KNOW Explain: _____

3. As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

YES NO DON'T KNOW Explain: limited knowledge of the site uses, over the past 30 years or so.

4. Does the purchase price being paid for this property reasonable reflect the fair market value of the property?

YES NO DON'T KNOW Explain: N/A, city already owns the site

If you conclude that there is a difference between the purchase price and fair market value and you answered NO above, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

YES NO DON'T KNOW Explain: N/A

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help us identify conditions indicative or releases or threatened releases? For example,

Do you know the past uses of the property?

a. YES NO DON'T KNOW Explain: limited, past 30 years or so.

Do you know of specific chemicals that are present or once were present on the property?

b. YES NO DON'T KNOW Explain: _____

Do you know of spills or other chemical releases that have taken place at or near the property?

c. YES NO DON'T KNOW Explain: _____

Do you know of any environmental cleanups that have taken place at or near the property?

d. YES NO DON'T KNOW Explain: _____

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
7. YES NO DON'T KNOW Explain: _____

LIST OF REQUESTED INFORMATION, IF AVAILABLE

- Names and phone numbers of key individuals with knowledge of Site use history.
- A map showing the boundaries of the subject Site.
- Tax ID numbers for parcels included within the Site.
- Copies of any past environmental Site assessment and/or audit reports or risk assessment studies.
- Environmental permits.
- Registrations for underground and above-ground storage tanks (if any).
- Material data safety sheets for hazardous substances used or stored on Site (if any).
- Community right-to-know plans pertaining to the Site.
- Safety plans pertaining to on-site facilities.
- Reports regarding geotechnical and/or hydrogeologic conditions.
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property.
- Recorded Activity Use Limitations (AULs).
- Title Report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2011 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/15/2011 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/26/2011 has revealed that there are 32

EXECUTIVE SUMMARY

CSCSL sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the LUST list, as provided by EDR, and dated 05/24/2011 has revealed that there are 18 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 05/24/2011 has revealed that there are 17 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/26/2011 has revealed that there are 7 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 06/15/2011 has revealed that there are 6 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

US Geographic Names Information System (GNIS) is the official vehicle for geographic names used by the federal government and the source for applying geographic names to federal maps and other printed and electronic documents.

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: WSQG
Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Violation Status: No violations found

FINDS:

Registry ID: 110005341665

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 06/14/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704

Number of Days to Update: 36	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 08/08/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 04/05/2011	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 04/05/2011	Telephone: 202-267-2180
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/05/2011
Number of Days to Update: 70	Next Scheduled EDR Contact: 10/17/2011
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 03/01/2011	Source: Department of Ecology
Date Data Arrived at EDR: 03/18/2011	Telephone: 360-407-7200
Date Made Active in Reports: 03/30/2011	Last EDR Contact: 06/14/2011
Number of Days to Update: 12	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Semi-Annually

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 04/26/2011	Source: Department of Ecology
Date Data Arrived at EDR: 04/27/2011	Telephone: 360-725-4030

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

CSCSL NFA: Confirmed and Contaminated Sites - No Further Action

The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Number of Days to Update: 25	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Number of Days to Update: 51	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 01/11/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/13/2011	Telephone: 202-343-9775
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 34	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (206) 553-1200
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/14/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

COUNTY RECORDS

KING COUNTY:

Abandoned Landfill Study in King County

The King County Abandoned Landfill Survey was conducted from October through December 1984 by the Health Department's Environmental Health Division at the request of the King County Council. The primary objective of the survey was to determine if any public health problems existed at the predetermined 24 sites.

Date of Government Version: 04/30/1985
Date Data Arrived at EDR: 11/07/1994
Date Made Active in Reports: N/A

SEATTLE COUNTY:

Abandoned Landfill Study in the City of Seattle

The Seattle Abandoned Landfill Survey was conducted in June and July of 1984 by the Health Department's Environmental Health Division at the request of the Mayor's Office. The primary objective of the survey was to determine if any public health problems existed at the predetermined 12 sites.

Date of Government Version: 07/30/1984

TACOMA/PIERCE COUNTY:

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	47122-B3 PUYALLUP, WA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

--	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNW
Site Name:	US GYPSUM CO
Site EPA ID Number:	WAD980835185
Groundwater Flow Direction:	NOT AVAILABLE
Measured Depth to Water:	approximately 10 feet
Hydraulic Connection:	A locally perched water table underlies the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Puyallup

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
2	12 inches	29 inches	loamy fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
3	29 inches	59 inches	fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1445

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX C
Selected Historical Research Documents

APPENDIX D
Report Limitations and Guidelines for Use

APPENDIX D REPORT LIMITATIONS AND GUIDELINES FOR USE

This appendix provides information to help you manage your risks with respect to the use of this report.

Read These Provisions Closely

Some clients, design professionals and contractors may not recognize that the geoscience practices (geotechnical engineering, geology and environmental science) are far less exact than other engineering and natural science disciplines. This lack of understanding can create unrealistic expectations that could lead to disappointments, claims and disputes. GeoEngineers includes these explanatory “limitations” provisions in our reports to help reduce such risks. Please confer with GeoEngineers if you are unclear how these “Report Limitations and Guidelines for Use” apply to your project or site.

Environmental Services Are Performed for Specific Purposes, Persons and Projects

GeoEngineers has performed this ESA of the property consisting of the existing City of Puyallup-owned parking lot property known as the AOB site at 330 3rd Street SW in Puyallup, Washington in general accordance with the scope and limitations of our scope of work dated July 7, 2011, ASTM E 1527-05, Standard Practice for Phase I ESAs, and EPA’s Federal Standard 40 CFR Part 312 “Standards and Practices for All Appropriate Inquiries (AAI).” This report has been prepared for the exclusive use of the City of Puyallup. This report is not intended for use by others, and the information contained herein is not applicable to other properties.

GeoEngineers structures our services to meet the specific needs of our clients. For example, an environmental site assessment study conducted for a property owner may not fulfill the needs of a prospective purchaser of the same property. Because each environmental study is unique, each environmental report is unique, prepared solely for the specific client and project property. This report should not be applied for any purpose or project except the one originally contemplated.

This Environmental Report Is Based on a Unique Set of Project-Specific Factors

This report has been prepared for the AOB site at 330 3rd Street SW in Puyallup, Washington. GeoEngineers considered a number of unique, project-specific factors when establishing the scope of services for this project and report. Unless GeoEngineers specifically indicates otherwise, do not rely on this report if it was:

- not prepared for you,
- not prepared for your project,
- not prepared for the specific property explored, or
- completed before important project changes were made.

If important changes are made to the project or subject property after the date of this report,

GeoEngineers should be retained to review our interpretations and recommendations and to provide written modifications or confirmation, as appropriate.

Reliance Conditions for Third Parties

Our report was prepared for the exclusive use of our Client. No other party may rely on the product of our services unless we agree in advance to such reliance in writing. This is to provide our firm with reasonable protection against open-ended liability claims by third parties with whom there would otherwise be no contractual limits to their actions. Within the limitations of scope, schedule and budget, our services have been executed in accordance with our Agreement with the Client and generally accepted environmental practices in this area at the time this report was prepared.

Historical Information Provided by Others

GeoEngineers makes no warranties or guarantees regarding the accuracy or completeness of information provided or compiled by others. The information presented in this report is based on the above-described research and a single recent site visit. GeoEngineers has relied upon information provided by others in our description of historical conditions and in our review of regulatory databases and files. The available data do not provide definitive information with regard to all past uses, operations or incidents at the subject property or adjacent properties.

Uncertainty Remains Even After This ESA Study Is Completed

No ESA can wholly eliminate uncertainty regarding the potential for recognized environmental conditions (RECs) in connection with a property. Performance of an ESA study is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property. There is always a potential that areas with contamination that were not identified during this Phase I ESA exist at the subject property or in the study area. Further evaluation of such potential would require additional research, subsurface exploration, sampling and/or testing.

Environmental Regulations Are Always Evolving

Some substances may be present in the vicinity of the subject property in quantities or under conditions that may have led, or may lead, to contamination of the subject property, but are not included in current local, state or federal regulatory definitions of hazardous substances or do not otherwise present current potential liability. GeoEngineers cannot be responsible if the standards for appropriate inquiry, or regulatory definitions of hazardous substance, change or if more stringent environmental standards are developed in the future.

Property Conditions Can Change

This environmental report is based on conditions that existed at the time the study was performed. The findings and conclusions of this report may be affected by the passage of time (for example, a Phase I ESA report is typically applicable for 180 days), by events such as a change in property use or occupancy, or by natural events, such as floods, earthquakes, slope instability or groundwater fluctuations. If more than six months have passed since issuance of our report or work product, or if any of the described events may have occurred, please contact GeoEngineers before applying this report so that we may evaluate whether changed conditions affect the continued reliability or applicability of our conclusions and recommendations.

Geotechnical, Geologic and Environmental Reports Should Not Be Interchanged

The equipment, techniques and personnel used to perform an environmental study differ significantly from those used to perform a geotechnical or geologic study and vice versa. For that reason, a geotechnical engineering or geologic report does not usually relate any environmental findings, conclusions or recommendations; e.g., about the likelihood of encountering underground storage tanks or regulated contaminants. Similarly, environmental reports are not used to address geotechnical or geologic concerns regarding a specific project.

Biological Pollutants

GeoEngineers' Scope of Work specifically excludes the investigation, detection, prevention or assessment of the presence of Biological Pollutants. Accordingly, this report does not include any interpretations, recommendations, findings, or conclusions regarding the detecting, assessing, preventing or abating of Biological Pollutants and no conclusions or inferences should be drawn regarding Biological Pollutants, as they may relate to this project. The term "Biological Pollutants" includes, but is not limited to, molds, fungi, spores, bacteria, and viruses, and/or any of their byproducts.

If the City of Puyallup desires these specialized services, they should be obtained from a consultant who offers services in this specialized field.
