

Complete the following table as applicable to the proposed project (include onsite and offsite improvements):

Description <sup>a</sup>	Onsite	Offsite	Total
<b>Existing Conditions</b>			
Total Project Area <sup>b</sup> (ft <sup>2</sup> )			
Existing hard surface (ft <sup>2</sup> )			
Existing vegetation area (ft <sup>2</sup> )			
<b>Proposed Conditions</b>			
Total Project Area <sup>b</sup> (ft <sup>2</sup> )			
Amount of new hard surface (ft <sup>2</sup> )			
Amount of new pollution generating hard surface (PGHS) <sup>c</sup> (ft <sup>2</sup> )			
Amount of replaced hard surface (ft <sup>2</sup> )			
Amount of replaced PGHS <sup>d</sup> (ft <sup>2</sup> )			
Amount of new plus replaced hard surface (ft <sup>2</sup> )			
Amount of new + replaced PGHS (ft <sup>2</sup> )			
Amount of existing hard surfaces converted to vegetation (ft <sup>2</sup> )			
Amount of Land Disturbed (ft <sup>2</sup> )			
Vegetation to Lawn/Landscaped (acres)			
Native Vegetation to Pasture (acres)			
Existing hard surface to remain unaltered (ft <sup>2</sup> )			
Existing vegetation area to remain unaltered (ft <sup>2</sup> )			

a. All terms are defined in the 2019 Ecology Manual glossary.

b. The total project area in the existing condition should typically match the total project area in the proposed condition.

c. The "amount of new PGHS" should be part of or all of "amount of new hard surfaces"

d. The "amount of replaced PGHS" should be part of or all of the "amount of replaced hard surfaces".
