Hi Nabila and Chris,

This email is intended to provide updated documentation for WSDOT’s shoreline substantial development permit (SSDP) (permit no. PLSDP20230027), which was issued on October 10, 2023 for the SR 167 Stage 2 Project. Since the 2023 permit issuance, the Stage 2 Project has been split into the Stage 2a and Stage 2b projects; all of the work covered by the SSDP is within the Stage 2a project. The work within the shoreline jurisdiction entails the construction of roadway improvements in the vicinity of the Meridian Avenue and State Route (SR) 512 Puyallup River bridges within the City of Puyallup’s shoreline jurisdiction.

The SSDP application materials included a Floodplain Impacts and Mitigation Memorandum (Attachment 8), which included a No-Rise Certification. As part of the design-build project delivery method, the grading plans and design have been refined, and the Design-Builder has therefore provided an updated No-Rise Technical Memorandum and No Rise Certification to document those changes (attached). The project elements and construction activities in the shoreline jurisdiction have not changed. These materials are being provided to you as an update to the project record.

Please let us know if you have any questions.

Thank you,

Logan Dougherty, PWS
Environmental Scientist, WSDOT
(425) 213-3654

WARNING: This email originated from outside of WSDOT. Please use caution with links and attachments.

Hello,

The City of Puyallup has approved with conditions a shoreline substantial development permit for Washington State Department of Transportation's SR 167/I-5 to SR 161 – New Expressway Project (Stage 2 Project). I have attached the permit date sheet to this e-mail.

Please let me know if you need me to include any other documents.

Below is a link to the project website that includes all project documents (application, final development review team letter), final conditions, etc.):
